Editorial Index 1970

Index to editorial articles appearing in Iron Age Metalworking International during the year 1970

Automation
- Automated Plating Provides More Speed, Quality Control, Mar p 30
- Automatic Bar Storage, May p 35
- Bar Feed Boosts Turning, Mar p 31
- Automation Technology Helps Auto Manufacturers, May p 33
- Computer on Transfer Line, Jan p 29
- Faster Tool Changing, Mar p 29
- Fluidics Automate Press, Nov p 21
- Press Builders Now Offer Complete Production Systems, Oct p 23
- Special Computer Developed for Mass Production Control, June p 38
- Special Production Machinery Built with Standard Equipment, Apr p 34
- Steelmaking Automation Quickens May p 30
- The Outlook for Automation In the Iron and Steel Industry, Jan p 23
- Why Computers Fail . . . Or Succeed, Oct p 12
- World Steelmen Report on Use of Process Computer Control, May p 27

Casting
- Continuous Vacuum Casting, Nov p 28
- For Better Diecasting, Sept p 39
- Foundry Uses Plastic Patterns, Nov p 30
- System Cuts Die Casting Costs, Aug p 38

Cold Extrusion
- Cold Extrusion of Shafts Builds Fatigue Life, Reduces Machining, Sept p 30
- Success of Cold Extrusion Dependent on Steel Chemistry, Feb p 23
- Four Steps Expand Tubing, Jan p 34

Cold Forming
- Four Steps Expand Tubing, Jan p 34
- Rare Metal Stretch Formed, June p 39
- Recent Advances Stir Interest in High Velocity Forming, Oct p 36
- USSR Uses Chipless Machining, Sept p 32

Cryogenics
- Liquid Natural Gas Opens New Metalworking Markets, Apr p 36

Fabricating
- Desalting: Metal's Viewpoint, June p 33
- Faster Heat Transfer, Nov p 32
- Giant Copper Coils Cut Downtime And Extend Production Runs, Nov p 31
- High Luster Finish Steel, Mar p 25
- Japan Builds Pressure Vessels By Electroslag Welding Process, July p 22
- Metalworking Dives into the Sea, Feb p 16
- Motorized Path, Rate Control Guides Welding, Cutting, Testing, May p 36
- Must Steel be Clean to Weld?, Jan p 26
- New U.S. Shipyard Combines Latest Equipment and Systems, July p 26
- NC Shear Helps Blanking, Apr p 27
- Special Production Machinery Built With Standard Equipment, Apr p 34
- Spiral Welds Stay on Target, June p 42
- Steel Pipe is Solderable, Feb p 20

Fasteners
- Nuts Come in Coil Form, Dec p 24

Fluidics
- Fluidic Controls: A Progress Report, Nov p 19

Heat Treating
- Controlled-Hardness Shot, Apr p 38
- Salt Bath Cuts Fatigue, July p 31

Hydraulics & Pneumatics
- Fluid Power Applications Growing at 12-25% Annual Rate, Nov p 22
- Jet Device Reduces Scrap, Aug p 40
- Pneumatic Pin Feeding Cuts Labour Cost by 90%, Nov p 24

Inspection
- Automation Technology Helps Auto Manufacturers, May p 33
- Computer Check on Properties Brings Tubing to Closer Limits, May p 40
- FM Lamb Wave Inspection System for Thin Sheet Steel, Mar p 22
- Sorting Alloys in the Shop, May p 37
- Ultrasonics Joins Computers For Fast, Accurate Testing, Sept p 28

Instrumentation
- For Better Diecasting, Sept p 39
- Ions Used in Measurement, Apr p 35
- Metals Research Has New Tool, July p 26
- System Cuts Die Casting Costs, Aug p 38
- The Laser Comes of Age, Sept p 25

Joining
- Can Titanium Brazing Join?, Dec p 23
- Recent Technical Development: Spot Weld Through Adhesive, Apr p 32
- Shims Are Cast-in-Place, Apr p 33

Machining
- Adaptive Control for Band Saws, Apr p 39
- Automatic Chucking Lathe, Oct p 26
- Automatic-Cycle Spline Grinder Cuts Machining Time Sharply, July p 30
- Automation Improves Gear Lines, Apr p 26
- Automation Technology Helps Auto Manufacturers, May p 33
- Abrasive Saw Has New Design, Feb p 28
- Bar Feed Boosts Turning, Mar p 31
- Chemical Machining Replaces Forging and Welding Techniques, May p 38
- Computer on Transfer Line, Jan p 29
- Cutting Tools Get Tougher, Harder, June p 27
- Diamond Grinds Ductile Metals, Mar p 21
- Diamond Grinds Stainless Steel, Sept p 37
- Directory of NC Machine Tools and Control Systems, 1970 Edition, Aug p 43
- Electrical Machining Directory 1970 Edition, Dec p 35
- Exapt Report: Trend Towards Technology, Aug p 36
- Faster Tool Changing, Mar p 29
- How Safe Is High-Speed Grinding? Dec p 25
- High-Speed Grinding Advances, Feb p 29
- How to Exploit Conventional Machine Tools, Dec p 21
- Large Forgings Are Machined By Twin-Turret Machine, Jan p 30
- Lathe Controlled by Templates, July p 32
- Machine Tool Review Hanover-Chicago 1970, Dec p 45
- Machining Gimbals, Dec p 28
- Machining Systems, Aug p 31
- NC Cuts Replacement Part Cost, Jan p 28
- NC Drill Press for High Output, Sept p 35
- NC Lathes: Choice is Wider, Nov p 25
- NC Show Guide, Hannover 1970, Aug p 57
- NC Spark Erosion Works Fast, June p 32
- NC Speeds Grinding of Racks, Oct p 27
- NC System Is Highly Efficient, Mar p 32
- New Programming Aid Simplifies NC Machining, Feb p 21
- New U.S. Shipyard Combines Latest Equipment and Systems, July p 27
- New Uses Spur Growth of Electrical Machining, Dec p 31
- Preview of Chicago, Aug p 61
- Production Efficiency Increased Through Integrated NC, Aug p 34
- Reducing Tool Chatter in Milling, Mar p 24
- Several Machining Methods Produce Transmission Parts, Apr p 30
- The Laser Comes of Age, Sept p 25
- USSR Uses Chipless Machining, Sept p 32
- Vertical Indexing Wheel, Oct p 38
- Wide Wheel Grinders Rough and Finish Grind in One Operation, June p 40

Management
- Computer Production Control for the Smaller Company, Sept p 11
- Cost Targeting: A Way to Avoid Extra Costs at Pre-Design Stage, Feb p 9
- Good Machine Design Is More Than A Pretty Face, Nov p 9
- Information Needs Activate Management Information System, May p 13
- Information Retrieval, Mar p 27
- Manage Research for Profits, Aug p 15
- Management Travels to Enhance Corporate Communication Effort, June p 17
- Managing System Wins Praise, Mar p 11
- Performance Appraisal System Helps Build Effective Managers, Apr p 11
- Production Control: Why the Computer? Dec p 11
- Quality Control Program Works, July p 11
- Small Company Finds Way to Win Skilled Workers, Jan p 9
- Why Computers Fail . . . Or Succeed, Oct p 12

IRON AGE METALWORKING INTERNATIONAL

IE-1008 (350)

XUM

Material Handling
Automatic Bar Storage, May p 35
Conveyor Cools Hot Coil Line, Feb p 32

Materials
Composites: In the Spotlight, Apr p 23
Cutting Tools Get Tougher, Harder, June p 27
Desalting: Metal's Viewpoint, June p 33
Faster Heat Transfer, Nov p 32
Good Machine Design Is More Than A Pretty Face, Nov p 9
Metalworking Dives into the Sea, Feb p 16
New Austenitic Stainless, June p 31
Plastic Behaves Like a Metal, Nov p 29
Rare Metal Stretch Formed, June p 39

Metal Cleaning and Finishing
Automated Plating Provides More Speed, Quality Control, Mar p 30
Controlled-Hardness Shot, Apr p 38
New Hardfacing Technique Has Numerous Applications, June p 36
Radiation Curing of Strip, July p 25
Spray Coating System Gives More Economy, July p 24

Metallurgy
Metals Research Has New Tool, July p 26
Micron Grains, Finer Steel, Sept p 31
New Worlds for Copper Through Research, Development, Mar p 26
Success of Cold Extrusion Dependent on Steel Chemistry, Feb p 23

Nonferrous Metals
Giant Copper Coils Cut Downtime And Extend Production Runs, Nov p 31
New Worlds for Copper Through Research, Development, Mar p 26
The New Vitality of Nonferrous, Jan p 17

Numerical Controls
Directory of NC Machine Tools and Control Systems, 1970 Edition, Aug p 43
NC Cuts Replacement Part Cost, Jan p 28
NC Drill Press for High Output, Sept p 35
NC Lathes: Choice is Wider, Nov p 25
NC System Is Highly Efficient, Mar p 32
New Programming Aid Simplifies NC Machining, Feb p 21

Pollution Control
Cutting Fluid Disposal is one Step in Pollution Control, Aug p 39
Cyclone Cleans Coolants, Jan p 31
Ions Used in Measurement, Apr p 35

Powder Metallurgy
Powder Metallurgy Progresses, July p 17

Power Transmission
Eddy Current Controls Make Large Presses More Versatile, June p 30

Presswork
Automatic Slug Shearing, Jan p 27
Eddy Current Controls Make Large Presses More Versatile, June p 30
Fluidics Automate Press, Nov p 21
A Press Which Makes Its Own Tooling, Nov p 27
NC Shear Helps Blanking, Apr p 27
Non-Smoking Die Lubricant, Oct p 34
Press Builders Now Offer Complete Production Systems, Oct p 23
Several Machining Methods Produce Transmission Parts, Apr p 30

Steelmaking
Abrasive Saw has New Design, Feb p 28
Alumina Basket Protects Ingots, Sept p 40
Automatic Equipment Solves Billet Transfer Problems, Mar p 28
Automatic Slug Shearing, Jan p 27
Automatic Bar Storage, May p 35
Bar Mill Has Multiple Outlets, May p 42
Clean Scrap from Shredder, Feb p 22
Cluster-Type Strip Mill Features Speed, Accuracy, Dec p 27
Composites: In the Spotlight, Apr p 23
Computer Check on Properties Brings Tubing to Closer Limits, May p 40
Computer-Controlled Shearing Increases Rolled Bar Output, Apr p 28
Continuous Vacuum Casting, Nov p 28
Conveyor Cools Hot Coil Line, Feb p 32
Desalting: Metal's Viewpoint, June p33
Electromagnetic Rollers Halve Costs, Dec p 29
FM Lamb Wave Inspection System for Tin Sheet Steel, Mar p 22
High Luster Finish Steel, Mar p 25
Japan Builds Pressure Vessels by Electroslag Welding Process, July p 22
Long-Life Rolls Double Output, July p 21
Metals Research Has New Tool, July p 26
Micron Grains, Finer Steel, Sept p 31
New Austenitic Stainless, June p 31
New Cryogenic Steel, Dec p 26
Powder Metallurgy Progresses, July p 17
Radiation Curing of Strip, July p 25
Steelmaking Automation Quickens, May p 30
Successful Cold Extrusion Dependent on Steel Chemistry, Feb p 23
The Outlook for Automation in the Iron and Steel Industry, Jan p 23
The Turn to Vacuum Metallurgy, Mar p 17
Two Processes Advance Metals Refining Technology, Jan p 32
Ultrasonic Joins Computers for Fast, Accurate Testing, Sept p 28
USSR Unveils ESR Technology, Feb p 25
World Steelmakers Increase Blast Furnace Top Pressure, Feb p 19
World Steelmen Report on Use of Process Computer Control, May p 27

Testing
Computer Check on Properties Brings Tubing to Closer Limits, May p 40
Sorting Alloys in the Shop, May p 37
Ultrasonics Joins Computers For fast Accurate Testing, Sept p 28

Welding
Automated Spot Welder Has Servo-Controlled Positioning, Sept p 38
Automatic Pipe Welding, Feb p 24
EB on Weld Joint, Mar p 23
Japan Builds Pressure Vessels By Electroslag Welding Process, July p 22
Light Beams, Micro-Plasma And Friction Mark Gains in Welding, Oct p 28
Motorized Path, Rate Control Guides Welding, Cutting, Testing, May p 36
Must Steel be Clean to Weld? Jan p 26
New EB Welding Unit Couples High Production with Quality, Oct p 33
New Hardfacing Technique Has Numerous Applications, June p 36
New U.S. Shipyard Combines Latest Equipment and Systems, July p 27
One-Side Welding in Japan, Oct p 35
Quality Field Fabrication, Oct p 32
Recent Technical Development: Spot Weld Through Adhesive, Apr p 32
Several Machining Methods Produce Transmission Parts, Apr p 30
Shipyards Are Pioneers in New Welding Techniques, Oct p 31
Spiral Welds Stay on Target, June p 42
The Laser Comes of Age, Sept p 25
Twin-Head Friction Welder, June p 41
